Q)1: What is a Computer ?

Q)2: What is Data ?

Q)3: What is Information ?

Q)4: What is Processing ?

Q)5: What is Hardware ?

Q)6: Write some examples of Hardware ?

Q)7: What is Software ?

Q)8: Write some examples of Software ?

Q)9: What are input devices

Q)10: Write some examples of input devices

Q)11: What is Keyboard ?

Q)12: What are the sections of a keyboard ?

Q)13: Write the name of these devices ?

Q)14: Write the name of keyboard section showing below ?

Q)15: Name the sections of keyboard ?

Q)16: Fill in the Blanks

Computer is _____ Machine

Printer is _____ device

Keyboard is laid out in _____ Pattern

Games are the example of _____

Physical parts of computer are called _____

Instructions given to computer are called _____

Look at this picture of a computer .

A computer is made up of many parts.

Let's explore the parts to see if you know what they are called!

The CPU

CPU stands for "Central Processing Unit". They contain the brains of the computer. They can be **desktop** models that the monitor sits on top of, or **tower** models that stand up tall.

The Monitor

The monitor looks like a TV and lets you see your work and your files.

The Keyboard

The keyboard is probably the most used input device. It operates a lot like a typewriter, but has many additional keys that let it do special things a typewriter can't.
